DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action or the MPEP.

Specification

The disclosure is objected to because of the following informalities: Please re-update the specification, "Related Applications" section, to include the new patent number. Appropriate correction is required.

Response to arguments: It is agreed that there is no requirement to update the specification to include the patent number, however, the examiner is no longer able to write in the updated information since creation of the IFW system. If applicant does not care if the patent number is printed or not, that is fine.

Claim Rejections - 35 USC § 102

Claims 18-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Jeter et al., US 5,683,420. See the comments set forth in the previous office action.

Double Patenting

Claims 18-37 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 51 of copending Application No. 09/907,931.

Claims 18-37 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 27-29 (withdrawn from prosecution) of copending Application No. 09/565,642.

Art Unit: 3762

Claims 18-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 33-42 of U.S. Patent No. 6,398,765.

Claims 18-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 5 of U.S. Patent No. 6,629,936.

Regarding the double patenting rejections, see the comments set forth in the previous rejections.

Response to Arguments

Applicant's arguments filed October 20, 2004 have been fully considered but they are not persuasive. The examiner maintains that the structure recited by the prior art is identical to the claimed structure. It is well established that the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3762

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
